

ISH Frankfurt, the largest exhibition in the HVAC industry, successfully took place **from 12 to 16 of March 2013**, in Messe Frankfurt exhibition grounds. More than 2.300 exhibitors, including **all market leaders worldwide**, launched their latest products, technologies and solutions onto the world market at ISH. For five days, international trade visitors from the installation trade, retail trade, firms of engineers and architects, housing and property companies, service providers, public authorities and universities met at Messe Frankfurt's Exhibition Centre.

On its very first day, the exhibition took an unexpected turn, because of the weather. The continuous snowfall caused more than a thousand flight cancellations at the Frankfurt Airport. That had a direct impact to the exhibition, the extremely low number of visitors, especially the international. However, the weather got better, the snowfall stopped and from the second day the visitors flow was restored.

3i International Innovative Industries had two different stands in different halls. The first was located in **Hall 6.1**, in which all major pipes production, pipes accessories, fittings and insulation were located. The stand was dedicated to the **closed cell elastomeric rubber insulation ISOPIPE**.

The second, was located in **Hall 9.1**, together with the leaders in heating industry, such as Wilo and Grundfos. The stand was about the highly efficient cast iron oil and gas boilers **TORRENT**, as well as the automated management system for heating devices **Torrent Energy Saving System**.

ISOPIPE®

Hall 6.1 A64

ISOPIPE is a new generation of **high performance insulation**. The closed **cell elastomeric rubber insulation** is a lasting solution. It has outstanding thermal protection and because of this its surface is absolute condensation resistant. In the year 2000, ISOPIPE insulation was awarded by the EUROPEAN Business Organization, due to its **excellent quality** and in 2012 acquired the **CE mark**.

3i also holds a **protected patent** for Innovative Product Design for the ISOPIPE UV protection and has all the legitimate certifications that are listed in a complete **book of certificates**. It has **four(4) lines of products**, **three(3) protection types**, **eight(8) different application types** and all the necessary **accessories** in order to offer complete solutions for your every need.

TORRENT®

Hall 9.1 G84

TORRENT is a complete series of **oil & gas boilers that offer maximum energy efficiency**, with four specially designed cast iron elements and available in five different models. Those **high performance boilers** have a range from **25KW to 1400KW or 21.686Kcal to 1.203.783Kcal!**

That means that there is a product for every need, whether it is a small house, an apartments building or a hospital and a school. **Torrent boilers** are designed and tested for **endurance and thermal efficiency** according to the **German DIN Standards and European EN Standards**. All boilers are casted in our modern foundry installations and controlled by experienced technicians.

New corporate identity for TZANOS GROUP OF COMPANIES

Hundreds of products, dozens of cooperating agencies, 3 firms, one group, **one signature**. With offices and warehouses all around **Athens, Thessaloniki and Barcelona**, a plant in **Ritsona**, a joint venture in **Italy**, with operations in import, export and production, TZANOS GROUP **covers your every need** in the fields of heating, plumbing, insulation and green energy.

New moto for 3i International Innovative Industries S.A. Rebuild the future!

16 years ago we chose to take the path towards innovation. The **unparalleled quality of our products**, our obsession for constant development and research for new technologies, have brought us in being one of the few companies in vertical production of insulation worldwide while our **export operation expands** nowadays **in more than 40 countries**. The constant investment in our R&D department has led us to a protected patent for Innovative Product Design for the ISOPIPE UV protection (Patent No.1004469), the design of new forms of protection (UV PLUS, Heavy Duty, Slit & Seal for existing installations), the wide variety of our products (ISOTUBE pre-insulated pipes, ISOSOUND & ISOCHIP acoustic insulation) and our **expansion in to heating industry** with the high performance **TORRENT boilers**. We hold numerous of certificates from independent global institutes guaranteeing quality and performance while recently ISOPIPE products have acquired CE mark which is essential for any product that is manufactured and sold into European market.

Innovation means to **challenge the past, reshape what's outdated, redefine the limits of quality..... rebuild the future!**

Display - Counter stand ISOPIPE

The distribution of our new display counter stand has begun. The display contains samples of the famous **ISOPIPE** insulation, enabling all professionals and customers to take a look closely on the **quality in our products' characteristics** and the **variety of options** based on their need. It also represents an **exceptional selling tool** since it enhances the professionals' ability to present each product and its properties. The displays contains samples from ISOPIPE TC, ISOPIPE HT, ISOTUBE, ISOSOUND, types of cover protection UV, UV PLUS, HEAVY DUTY and the innovative product Slit & Seal, ideal for existing installations.
